Education

University of Wisconsin - Whitewater

May 2024

M.S. Computer Science

University of Hong Kong

Dec 2020

B.S. Mechanical Engineering

Technical Skills

Python, SQL, C#, Java, JavaScript, R | Power BI (DAX), Excel/Google Sheets | Azure, Git | React, Node.js, HTML/CSS | Revit/Revit API, Rhino, Grasshopper, SolidWorks

Experience

KGS Technology Group

Remote

Data Engineer

July 2025 – March 2026

- Built Python + SQL ETL pipelines ingesting API/CSV data into curated warehouse tables for analytics
- Implemented data quality checks + structured logging (null/duplicate/schema) to improve reliability and speed debugging

American Solar Energy Society

Remote

Data Analyst Intern

Jan 2025 – Nov 2025

- Developed Power BI dashboards (DAX, drill-through) to analyze membership, webinar, and event engagement and inform program strategy
- Built a Google Sheets CRM for 1,500+ contacts with automated workflows, reducing manual outreach by 40% and enabling personalized sponsor communications

Community Dreams Foundation

Remote

Volunteer Data Engineer

Nov 2024 – Apr 2025

- Implemented Azure ETL components to ingest and validate application data while modernizing legacy pipelines
- Contributed to data modeling and documentation to improve interoperability across services and teams

University of Wisconsin - Whitewater

Whitewater, WI

Graduate Assistant

Sept 2022 – May 2024

- Analyzed Google/Facebook Ads and built Power BI dashboards tracking 20+ KPIs; guided budget shifts supporting 6,740 enrollments
- Improved academic and program webpages using engagement data to strengthen accessibility and user experience for prospective students and families

Projects

BIM Analytics Twin ([link to project](#))

- Built a full-stack Digital Twin BIM viewer (React/Three.js + FastAPI) with an IFC upload pipeline that converts IFC -> GLB and extracts metadata/hierarchy for downstream analysis.
- Delivered interactive BIM analysis tools (view presets, section planes, X-ray/isolation, structure tree + properties, embodied carbon + HVAC + occupancy insights) to make complex models accessible and actionable.

Chicago Building Permit Retrofit Analysis & NLP Classification ([link to project](#))

- Built an NLP classification pipeline to label 132,439 permits across 51 wards into 18 retrofit categories; identified 31,819 retrofit permits and a 19.7-day average processing time
- Developed a Mapbox GL JS + ECharts dashboard to visualize retrofit activity and permit processing times by ward and community

Additional Experience

Lalan Group

Sri Lanka

Mechanical Engineer

May 2021 – Nov 2021

- Monitored energy consumption for a 16 Mkal/hr thermic fluid heater and identified efficiency improvement opportunities

Vidullanka PLC

Sri Lanka

Engineering Intern

Feb 2021 – Apr 2021

- Helped develop a Python SARIMA forecasting model using historical load trends to predict energy consumption for biomass and hydropower assets
